

Arindam Majumder

Senior Developer Advocate | AI Agents • Developer Experience • Open Source

India • arindammajumder2020@gmail.com • arindamm.dev • GitHub • LinkedIn • YouTube • X / Twitter

SUMMARY

Developer Advocate and AI engineer helping developers adopt AI agents, developer tools, and modern application platforms. Partnered with **30+ startups and enterprise teams** on SDK integrations, technical education, open-source examples, launch strategy, and developer programs. Built **100+ practical AI projects**, grew an open-source repository to **13K+ GitHub stars**, and authored **100+ technical articles** with **1M+ cumulative views**. Combines hands-on engineering with clear communication, community leadership, and developer-focused go-to-market execution.

EXPERIENCE

Co-Founder

Studio1

Sep 2024 – Present

Remote

- ▷ Led developer advocacy and technical go-to-market programs for **30+ AI, DevTools, SaaS, and infrastructure companies**, spanning YC-backed startups, public companies, and enterprise engineering teams.
- ▷ Grew the agency beyond **\$100K in annual revenue** while building a distributed team and delivering developer content, demos, and education programs with **65%+ client retention**.
- ▷ Built production-ready AI applications, SDK integrations, MCP servers, agent workflows, starter templates, and open-source examples that helped developers move from product discovery to implementation.
- ▷ Partnered with product and engineering teams to improve API onboarding, documentation, developer journeys, integration patterns, and feedback loops; translated recurring developer friction into actionable product and DX improvements.
- ▷ Led launch campaigns and influencer management for developer-focused companies, coordinating technical content, creator partnerships, YouTube, newsletters, webinars, podcasts, and community activations; helped multiple products reach **Top 3 on Product Hunt**.
- ▷ Built and maintained an open-source AI examples ecosystem with **100+ practical projects** and **13K+ GitHub stars**, covering agents, MCP, RAG, voice AI, memory, workflows, and evaluation patterns.

Developer Advocate

Pieces for Developers

Feb 2024 – Oct 2024

Remote

- ▷ Built developer tools with the Pieces SDK, including a command-line interface and sample applications that demonstrated practical SDK workflows and integration patterns.
- ▷ Improved SDK documentation, glossary content, onboarding guides, and implementation tutorials, making core product concepts easier to discover and apply.
- ▷ Maintained open-source repositories and community resources, supported contributors, and carried developer feedback back to product and engineering teams.
- ▷ Hosted live coding sessions, office hours, community programs, and developer events; contributed technical education and launch support to a Product Hunt campaign that became **Product of the Day**.

Developer Relations Engineer Intern

Keptio

Nov 2023 – Feb 2024

Remote

- ▷ Created technical articles, tutorials, demos, and sample applications that helped developers understand and adopt API testing and open-source workflows.
- ▷ Maintained documentation and GitHub repositories, created good-first issues, reviewed community pull requests, and supported contributor onboarding.
- ▷ Organized GitTogether events and workshops while growing engagement across Slack, open-source programs, and developer communities.

SELECTED PROJECTS

Formaly

Next.js • TypeScript • PostgreSQL • AI

- Built and launched an AI-powered conversational forms platform that turns prompts and unstructured input into structured surveys, chat-based interviews, and actionable response analysis.
- Owned the product lifecycle from architecture and LLM guardrails to multi-tenant infrastructure, public APIs, billing, launch, and early customer acquisition; gained paying customers in the first week.

Awesome AI Apps

Python • TypeScript • AI Agents

- Built and co-maintain a collection of **100+ production-oriented examples** spanning AI agents, MCP servers, RAG, voice AI, memory, orchestration, and full-stack LLM applications.
- Grew the repository to **13K+ GitHub stars** through organic developer adoption, practical documentation, consistent releases, and contributor-friendly project structure.

WisprGemma

Gemma 4 E2B • WebGPU • Chrome MV3

- Built a local-first multilingual dictation web app and Chrome extension that runs Gemma 4 E2B entirely in the browser, keeping audio on-device and working offline after the initial model download.
- Implemented streaming speech recognition, cleanup, and rewriting in one model pass, with clean, verbatim, polished-email, and multilingual-to-English modes plus direct insertion into text fields on any page.

TECHNICAL CONTENT

- Authored **100+ technical articles** with **1M+ views** across platforms, covering AI agents, developer tooling, SDKs, APIs, open source, and modern application development.
- Produce hands-on YouTube tutorials, technical walkthroughs, product demos, documentation, launch guides, newsletters, and implementation content for developers.
- Design content systems from developer research and editorial strategy through technical validation, production, distribution, repurposing, measurement, and iteration.

OPEN SOURCE

- Maintain developer-facing repositories and practical AI examples used by thousands of developers; own roadmap, issue triage, documentation, release quality, pull-request review, and contributor guidance.
- Create reusable starter projects and integration references that reduce time-to-first-success across AI frameworks, SDKs, APIs, and developer platforms.
- Build community contribution paths through clear repository structure, good-first issues, contribution guides, and responsive maintainer support.

COMMUNITY & SPEAKING

- Speak at conferences, meetups, and workshops on AI agents, LLMs, open source, developer tools, and modern web development; appearances include Google Developer Groups, React Kolkata, GitTogether, and MongoDB community events.
- Lead organizer of React Kolkata, producing online and in-person events and creating a consistent forum for developers to learn, share projects, and meet peers.
- Host technical workshops, office hours, community calls, podcasts, webinars, and X Spaces with partner companies and developer communities.
- Mentor developers through hackathons, workshops, open-source programs, issue design, code review, and contributor onboarding.

SKILLS

Developer Advocacy: Developer Relations, Developer Experience, Technical Writing, Documentation, Developer Education, Community Building, Public Speaking, Workshops, Content Strategy, Product Launches

AI: LLMs, AI Agents, MCP, RAG, Prompt Engineering, Vector Databases, LangChain, LangGraph, CrewAI, OpenAI, Anthropic, Gemini

Engineering: Python, TypeScript, JavaScript, SQL, Next.js, React, Node.js, FastAPI, REST APIs, SDK Integrations

Platforms & Tools: Git, GitHub Actions, Docker, PostgreSQL, Supabase, Vercel, Cloudflare, Open Source Maintenance

EDUCATION
